SPILL DEFENCE

MANUFACTURERS OF SPILL CONTROL PRODUCTS

Why Spill Defence?

We manufacture the products.

We sell the products.

We deliver the products.

Spill Defence Manufacturing are a newly established manufacturer of sorbent products for control and prevention of liquid spillages. Predominantly specialising in the manufacture of socks, pillows, booms, and organic granules. We pride ourselves on our experienced team, who for over 30 years have been instrumental in the development and manufacture of sorbent products.

We operate production from two sites based in Rotherham and Worcestershire so we are able to cover the whole of the UK rapidly from our large stocks. Both sites operate with a high degree of autonomy so are less affected by supplier delays.

We have a bank of circular knitting machines and in-house printing machine allowing for customer own branding and any bespoke requirements. Products are tested in accordance with BS7959-1:2000. All our products are “sustainable”.

Our core fill is made from 100% recycled material which otherwise would go to land fill, reducing our carbon footprint along with our policy of using as many UK suppliers as possible.

We are the innovator of spill control and are always developing new products to increase our customer range.

Industry colour coding for absorbents

Absorbents are one of the most effective and efficient ways of containing and recovering spilt liquids. Having the correct type of absorbents on site will allow you to manage any potential

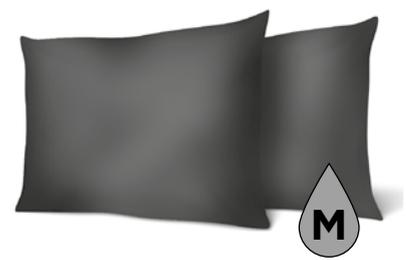

workplace spillage. To ensure that you chose the correct type of absorbent, below is a simple guide to the colour coding of absorbents.

Chemical Yellow
For use on spills of aggressive liquids i.e. Acids and Alkalis. Known as universal absorbent because of its ability to absorb most liquid spills.

Oil Only White
Oleophilic properties (it attracts oils). For the preferential absorption of oil based liquids on land or water.

Maintenance Grey/Black
For mainly indoor use on spills of non aggressive water and oil based fluids and mild chemicals.

CHEMICAL SOCKS

Chemical Sock for use on hazardous spills. The combination of a flexible spunbond outer with a 100% recycled fill ensures rapid absorption and superb retention.

Features and Benefits

- Sock for absorbing hazardous liquid spills.
- Flexible 100% PP skin allows sock to be placed in difficult areas.
- Chemical Sock for universal use on all liquids. 100% polypropylene spun bond outer sleeve.

OIL ONLY SOCKS

Oleophilic properties - for use in both indoors and outdoors.

Features and Benefits

- Ideal for absorbing spills in difficult to access places.
- Can be used to catch spills under machinery or where drips and leaks are a problem.
- Non-woven outer and high grade polypropylene ensures excellent absorbency and strength.
- For both inside and outside use.

MAINTENANCE SOCKS

Maintenance sock with grey philic 100% PP spun bond outer sleeve. The combination of a flexible outer with a 100% recyclable philic fill ensures rapid absorption and superb retention.

Features and Benefits

- Essential spill kit constituent.
- For pro-active use (stop leaks spreading) and reactive use (on accidental spill).
- Flexible nature of sock allows it to mould around difficult machine bases
- General purpose use on non aggressive miscible liquids.

CHEMICAL PILLOWS

Contain an absorbent blend of chopped universal polypropylene. Spill Defence absorbent pillows are excellent for absorbing spills and catching leaking fluids. Our absorbent pillows are typically used to catch leaks under equipment or drums.

Features and Benefits

- Ideal for absorbing high capacity spills quickly.
- Universal absorbent for dealing with chemical, miscible, alkali liquids spills.
- 100% PP high visibility outer tough spun bond skin to stand up to rigorous use.
- Available in various sizes including any bespoke requirements.

OIL ONLY PILLOWS

Oil Only pillows have oleophilic properties ie. attracts oils and repels water making it ideal for out door use.

Features and Benefits

- Ideal for absorbing spills in difficult to access places.
- Can be used to catch spills under machinery or where drips and leaks are a problem.
- Non-woven outer and high grade recyclable polypropylene ensures excellent absorbency and strength.

CHEMICAL BOOMS

Chemical booms are an effective way to contain and absorb large capacity hazardous spills on land.

Features and Benefits

- Ideal for absorbing large aggressive spills.
- Non-woven outer and high grade polypropylene ensures excellent absorbency and strength.
- Chemical resistant netting.
- Bespoke sizes on request

OIL ONLY BOOMS

Oil Boom is the ideal choice for quick response and marine placement (all in one construction prevents booms falling apart on recovery), carefully secured rope runs along the side to prevent twisting. Our booms also feature rustproof end rings and carabena clips so they can be easily clipped together to form larger barriers. UV established netting helps prevent deterioration in sunlight increasing lifespan.

Features and Benefits

- Can be used on land or water to contain the spread of Oil and other immiscible liquids.
- Can be placed around at-risk drain outlets to contain spills at source.
- For medium to long term deployment
- Will not sink even when fully saturated.

FLAME RETARDANT ORGANIC COMPOUND GRANULES

Organic Compound, Lightweight and highly absorbent. Packed in 30ltr bags. Sustainable absorbent compound granules offer instant absorbency and are suitable for indoor and outdoor use. The granules offer high absorbency, are lightweight, easy to handle and fire retardant to British Standard BS476 part7 Class 1.

Features and Benefits

- Sae Soak Organic Compound, lightweight and highly absorbent.
- Sustainable absorbent compound granules, offer instant absorbency and are suitable for indoor and outdoor use.
- The granules offer high absorbency, are lightweight, easy to handle and are fireproof.

CHEMICAL PADS AND ROLLS

Chemical absorbents are generally yellow in colour, they are ideal for use on spills involving aggressive chemicals (acids and alkalis) either inside or outside.

Features and Benefits

- Sonically bonded with cover stock to improve strength and reduce linting.
- For use on most liquids including aggressive Chemicals.
- Highly absorbent with excellent fluid retention fluid properties.
- Perforated for economy of use.

PRODUCT No	DIMENSIONS	ABSORBS	QTY IN PACK

SPILL CONTAINMENT

Spill Defence offer a wide range of equipment to contain and store liquids in a safe manner. Our containment products meet Oil storage regulations as well as promoting good housekeeping and improved safety in the workplace.

DRUM SPILL PALLETS

- Corrosion free
- EU & UK compliant Oil storage.
- Removable plastic grids.
- Supplied with forklift Pockets for ease of movement.

Product no	Dimensions	Sump	Weight
PCSP02DRUM	122cm x 82cm x 33cm	240 Litre	23kg
PCSP04DRUM	128cm x 128cm x 28cm	230 Litre	29kg

Bunded Workfloors

- Made from PE.
- 100% Recyclable.
- Used with or without platform.
- Stackable for easy transportation & storage.
- Non-slip platform surface.
- Easy to clean.
- Designed to fit on Euro pallets.
